

Exercise Guidelines

This Challenge is about building consistency with nutrition, but that doesn't mean exercise isn't important too.

You can (and should) be working out and staying active most days of the week.

As far as activity goes, **I recommend getting at least 30 minutes of light cardio per day.** Some examples would be brisk walking, light biking, or light elliptical work. Alternatively, you can do a Metabolic Cardio Workout.

If you like keeping track of your daily steps, **then aim for 6-10k steps a day (on average) as your minimum goal.**

Notes for Full Body Workouts

Reps

The number of repetitions you're aiming to hit for each set of an exercise. If there's a unilateral exercise (using one arm/leg), you will see rep goals with per arm, per leg, per side, or some other variation.

Rest Times

The amount of time you should rest between each set. Folks tend to rush their rest times, which leads to less than optimal recovery. In turn, they're not able to give 100% on every set of an exercise.

I want you to follow the rest time recommendations I give for each exercise to the best of your ability. Using a timer on your phone or clock will help.

How Hard Should You Push?

For the strength training workouts, you want to push hard enough that you're challenged, but not so hard that you can't physically do another rep (unless you see "failure" in the rep range column).

4 WEEK GYM-BASED ROUTINE

The Pre-Workout Warm-Up Routine

This warm-up should take you no more than 5-10 minutes, and I want you to do it before each workout.
